

SPECIAL PROVISIONS

ITEM: 9240015 –FORCE ACCOUNT WORK (PROVIDE ELECTRICAL SERVICE)

DESCRIPTION:

The work under this item shall consist of coordinating with and paying all necessary fees to the local utility company to furnish all labor, equipment and materials necessary to install a new complete functioning electrical service to power the roadway lighting and traffic signal systems. The contractor will provide to the Engineer, for review and approval, copies of all agreements between the utility company and the contractor. The contractor may proceed with those agreements after Engineer approval. The contractor shall not proceed before receiving Engineer approval. If the contractor proceeds before or without Engineer approval, the Engineer may withhold reimbursement to the contractor. The contractor shall submit the paid invoice, with the allowable force account mark up of 10%, for the utility company service installation to the Engineer for reimbursement during the normal project billing cycle.

METHOD OF MEASUREMENT:

Electrical service to power the roadway lighting and traffic signal system will be measured as a force account item in accordance with the provisions of Section 109.04 (D) of the 2000 ADOT Standard Specifications for Road and Bridge Construction. The installation shall include all services as required by the plans, Specifications and these Special Provisions.

BASIS OF PAYMENT:

The accepted quantities of electrical service to power the roadway lighting and traffic signal system, measured as provided above, will be paid for by force account to the contractor for those fees indicated on the paid invoice with the allowable mark up provided in the Standard Specifications.
